

The 13th International Chemical Engineering Congress and Exhibition (ICChEC 2026)

Tehran, Iran, 2026

In the Name of God

Distinguished Professors, Esteemed Researchers, Honorable Colleagues from Academia and Industry, and all valued participants of the 13th International Chemical Engineering Congress

Greetings and best regards,

As we reach the conclusion of this valuable scientific event, on behalf of the Executive Secretariat of the Congress, I would like to express my sincere appreciation and gratitude to all those whose valuable presence, support, and contributions played a significant role in organizing this edition of the Congress.

The 13th International Chemical Engineering Congress was planned with the aim of continuing the valuable path established through the previous twelve editions and with the vision of strengthening the connection between academia, industry, and the chemical engineering community of the country. Our effort was to hold this edition, like previous ones, in person, providing an opportunity for direct interaction among professors, researchers, and industry professionals. However, considering the prevailing circumstances and practical considerations, it was ultimately decided that this edition would be held virtually, utilizing technological capabilities while maintaining scientific standards.

Although a virtual event cannot fully replace the valuable atmosphere of an in-person gathering and direct scientific interactions, the active participation of the scientific community demonstrated that the process of knowledge creation, exchange, and advancement can continue with strength under different circumstances.

On this occasion, I sincerely thank all professors, researchers, students, authors of scientific papers, and respected reviewers whose academic contributions enriched this event.

I would also like to express my appreciation to the Iranian Association of Chemical Engineering, the respected members of its Board of Directors, the Scientific Committee, the Executive Committee, the dedicated colleagues of the Executive Secretariat, and all those who contributed in various ways toward achieving the objectives of this Congress.

It is also my privilege to extend my special appreciation to Mr. Seyed Abbas Mousavi Rahpeima, President of the Iranian Association of Chemical Engineering, whose valuable

support and cooperation have played an influential role in advancing the activities of the Association and in the successful organization of this Congress.

Furthermore, the valuable support of Fouman Shimi, Nouri Petrochemical Company, and Pasargad Energy as sponsors and supporters of this scientific event is sincerely appreciated. The contribution of these industrial organizations represents the importance of constructive collaboration between industry and academia and highlights the essential role of industry in supporting scientific and research development.

I would also like to acknowledge all the efforts and planning undertaken for organizing specialized workshops, inviting distinguished speakers, and expanding the participation of the international scientific community. Although the complete implementation of all these programs was not possible in this edition, these efforts demonstrate the commitment of the Congress Secretariat toward enhancing the scientific quality and international standing of the event.

Finally, I hope that the 13th International Chemical Engineering Congress will continue to serve as a platform for knowledge exchange, the development of scientific collaborations, and the strengthening of connections between academia and industry. I look forward to future editions of this valuable event with broader participation from the national and global scientific communities.

Thank you all for your presence, support, and valuable cooperation.

Wishing you all health, success, and prosperity.

Sincerely,

Seyed Hamed Mousavi
Faculty Member, University of Tehran
Executive Secretary of the 13th International Chemical Engineering Congress
